

UNDIAGNOSED GENETIC CONDITIONS

Information Event, Portsmouth, Friday 14 June

10:00–14:00

Does your child have global developmental delay (GDD) or learning/physical difficulties that are unexplained?

Is your child suspected to have a genetic condition but the doctors don't know what it is? Or have they had genetic test results that have come back negative or of unknown clinical significance?

Is your child taking part in genetic research such as Deciphering Developmental Disorders (DDD) or the 100,000 Genomes Project?

If you answered yes to any, or all, of the above questions then come along. Places are free but limited so booking is essential. To book your place, or to find out more, email: info@undiagnosed.org.uk or call (0)20 7831 0883.

The event will take place at Mary Rose Academy, Gisors Rd, Portsmouth, PO4 8GT.

Talks will cover:

- Why are some conditions so hard to diagnose? Why does genetic testing take so long?
- What is life like raising a child with an undiagnosed genetic condition?
- Update on Deciphering Developmental Disorders (DDD)/100,000 Genomes Project.

You will also be able to meet the local SWAN UK Parent Rep and other local families affected by undiagnosed genetic conditions.

SWAN UK is a support network run by the charity Genetic Alliance UK.
